

Trainings

NX Transfer Training

General:

- Duration: 5 days (7 training hours per day)
- Detailed training documentation in German language
- NX version according to customer's request

Prerequisites:

- CAD experience with another 3D modeler

Content:

- **NX Basics**
Handling of the layout and user interface.
Introduction to the basic functions (standard SIEMENS ribbon bars).
- **Modeling**
Introduction to the sketching technique.
Building parametric and change-friendly models.
Explain all form elements and operations.
Work effectively with the help of the presentation methodology and layer technique.
Analyze and measure 3D geometry.
- **Assemblies**
Introduction to the Master Model concept.
Create and modify assembly constraints.
Design of multi-level assembly structures.
Create dependencies in assemblies and components.
Creation of variable positioning.
Collision detection capabilities.
Create exploded views.
- **Drafting**
Drawing sheets and frames.
Derive, project and intersect views.
Create details, breakouts and shortened views.
Drawing completion (center lines, dimensioning, texts ...).
Special representations (explosion views; variants ...).

Implementation:

- The training consists of theoretical and practical parts
- Training at the customer's site or as a webinar
- Dates and prices available upon request
